K. RAVI KUMAR

Hyderabad, India | +91-7702625476 | kravik640@gmail.com | linkedin.com/in/ravikumar | github.com/ravikumar-143

PROFESSIONAL SUMMARY

Passionate Computer Science Engineering student with strong CS fundamentals (Data Structures, OOP, SQL, Python, JavaScript) and hands-on experience building full-stack applications. Demonstrated ability to build and ship real projects using modern AI coding assistants while maintaining strict quality control through manual code reviews, debugging, and root-cause analysis. Eager to take ownership and solve complex backend/frontend problems as an entry-level Software Engineer. Open to on-site opportunities in Bangalore.

CORE TECHNICAL SKILLS

- **Languages & Fundamentals:** JavaScript, TypeScript, Python, SQL, Data Structures & Algorithms (DSA), OOP, DBMS, Computer Networks
- **MERN & Web Tech:** MongoDB, Express.js, React.js, Node.js, RESTful APIs, FastAPI, HTML5, CSS3, Relational Databases (MySQL, PostgreSQL)
- **AI Tools & Quality Control:** AI Coding Tools (Cursor, GitHub Copilot, V0, Claude), Prompt Verification, AI Code Review, Bug Investigation & RCA
- **Developer Tools & Process:** Git, GitHub, Linux Commands, Postman, VS Code, Agile Sprints

TECHNICAL PROJECTS

Web Desktop Environment **JavaScript, React.js, Node.js, Express.js, HTML5/CSS3, Git**

- Architected and shipped an interactive browser-based desktop environment featuring window management, taskbar navigation, multi-app context switching, and state persistence.
- Accelerated code scaffolding and feature implementation using AI coding tools (Cursor / GitHub Copilot).
- Conducted manual code reviews and rigorous edge-case testing to identify AI hallucinations, fix state mutation bugs, and ensure proper asynchronous data handling.
- Designed modular UI components and responsive styling, ensuring sub-second rendering performance during dynamic drag-and-drop actions.

EXPERIENCE / INTERNSHIP

Software & Technical Analyst Intern | Uptoskill Technologies Pvt. Ltd., Hyderabad, India **Feb 2025 – May 2025**

- Developed custom Python and SQL scripts to automate data verification, reducing execution cycles by 25%.
- Analyzed software bugs and operational errors using root-cause analysis (RCA) techniques to optimize platform execution.
- Collaborated with engineering teams in Agile sprints to document technical workflows and maintain version control via Git/GitHub.
- Participated in system integration tests and API response validations to ensure robust software release performance.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering **Expected Graduation: April 2026**

Anurag University, Hyderabad, India

Diploma in Civil Engineering **Completed: April 2023**

Sree Vishveshwaraya Polytechnic, Mahabubnagar, India

CERTIFICATIONS & PROBLEM SOLVING

- Software Engineering & Version Control Essentials (Git/GitHub)
- SQL (Intermediate) Certification – HackerRank
- LeetCode Problem Solving: 130+ DSA Problems Solved (Arrays, Strings, Hash Maps, Linked Lists)
